Sustainable Capital Finance

Commercial Scale Clean Energy Financier

- SCF is a **third-party financier** for **commercial & industrial (C&I)** solar projects and electric vehicle charging infrastructure
- Founded in **2012**; 100+ distributed generation (DG) projects and \$500mm+ transacted and/or earmarked for pipeline
- SCF works directly with **solar developers** and **energy consumers** to provide **PPA & takeout solutions** for commercial, municipal and non-profit projects
- In recent years, **energy storage & fast charging** solutions have been added to the SCF Suite, a proprietary cloud-based financing platform

SCF's Project Highlights

SCF's Difference

Fast & Streamlined PPA Pricing

SCF as a Sales Resource

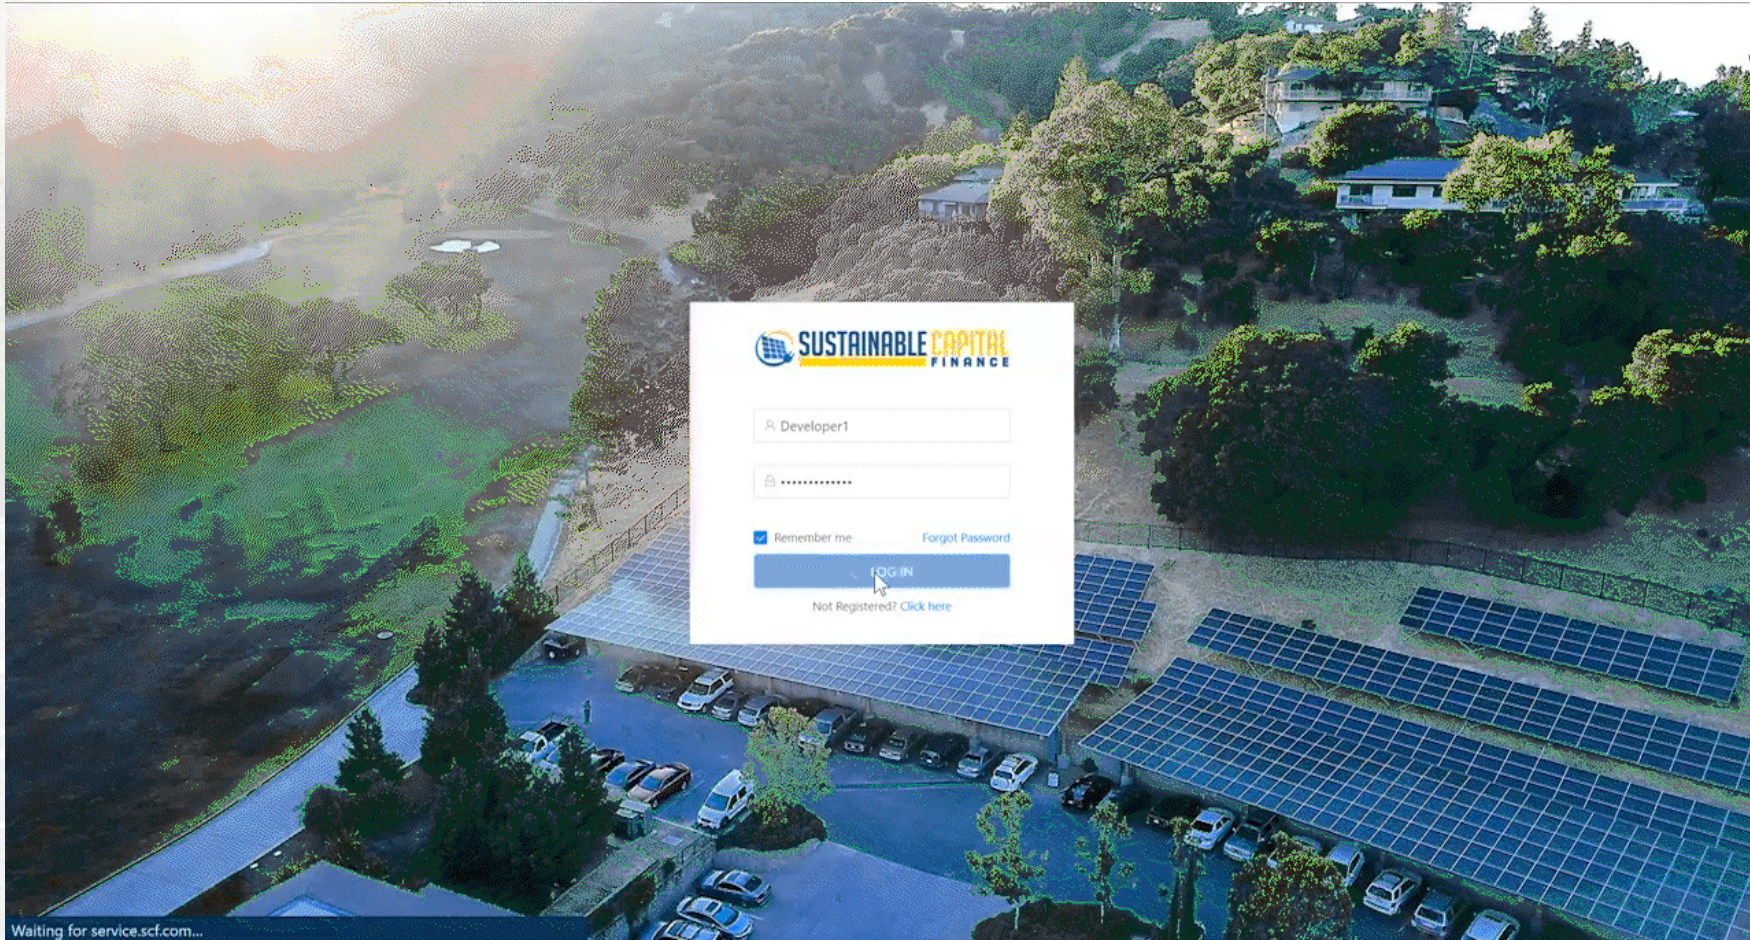

Simplified PPA Process

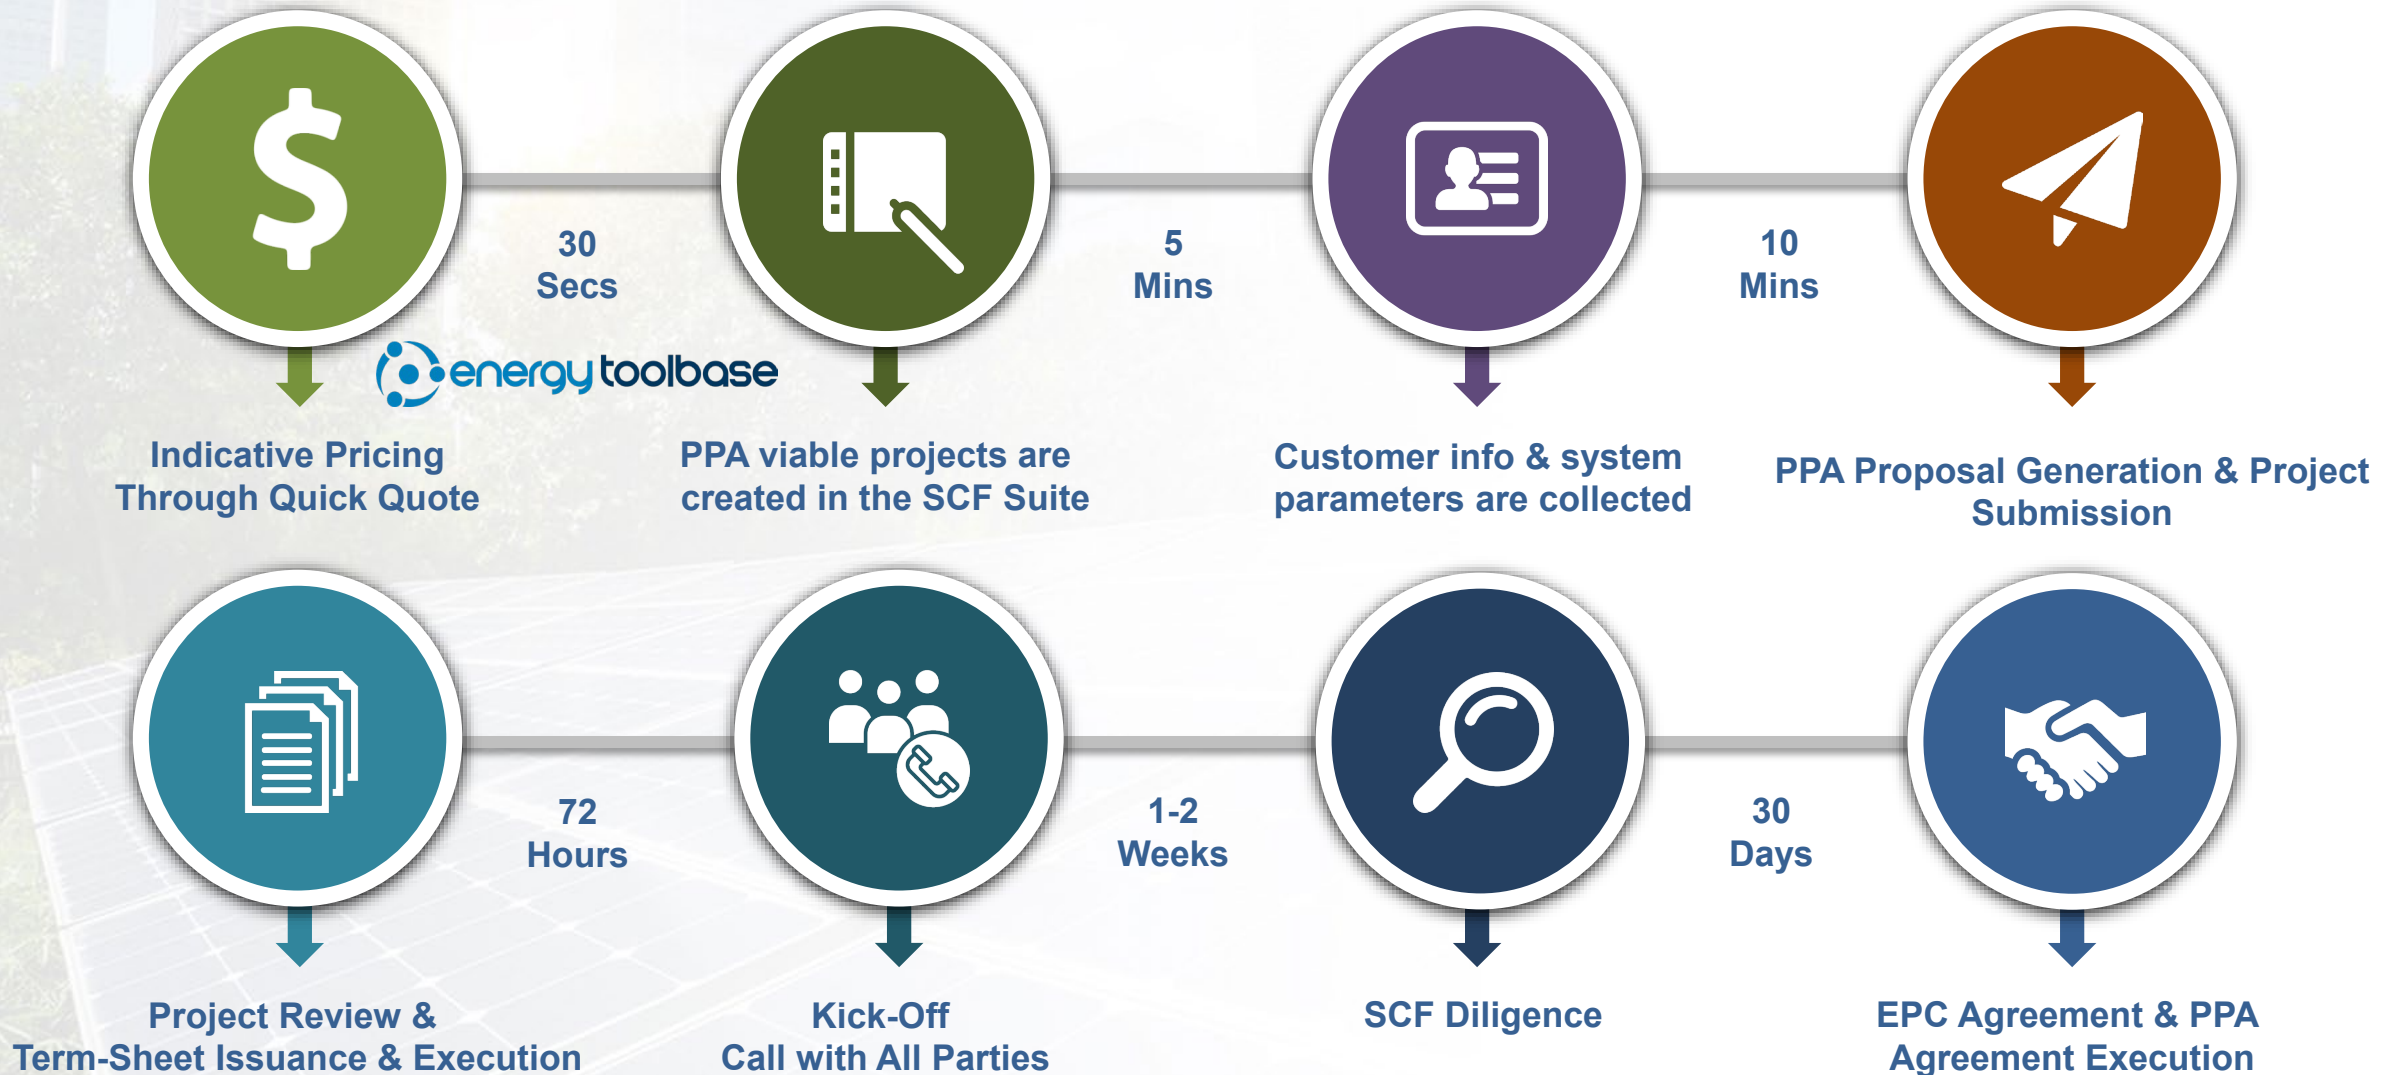

Proven Track Record

A Cloud-Based Underwriting and Diligence Platform

SCF's Simplified PPA Process

Introductory Calls

SCF as a Sales Resource

SCF participates in introductory and/or early sales calls & meetings with energy consumers, to build rapport and answer questions regarding the PPA process

- Answering questions in real-time, builds trust & certainty
- Builds a united front with our Origination partners, and the customer
- Introducing the financier earlier in the process can expedite the diligence & contracting process.

SCF's Suggested Involvement:

Savings Proposals

Terms Negotiation

Fast Term Sheet & PPA Generation

Chat & Resources

Inflation Reduction Act of 2022

- **A possible extension in the Federal Investment Tax Credit (ITC)**– 26% back to 30%.
 - **Safe Harbor:** Clarification by the IRS Via Notice 2021-41, a minimum of 5% of total project cost as well as ongoing construction progress is required in order to secure 2022 ITC.
- **Depreciation:** Energizing a project in 2023 would drop the eligible capex for bonus depreciation from 100% to 80%
